

Early Journal Content on JSTOR, Free to Anyone in the World

This article is one of nearly 500,000 scholarly works digitized and made freely available to everyone in the world by JSTOR.

Known as the Early Journal Content, this set of works include research articles, news, letters, and other writings published in more than 200 of the oldest leading academic journals. The works date from the mid-seventeenth to the early twentieth centuries.

We encourage people to read and share the Early Journal Content openly and to tell others that this resource exists. People may post this content online or redistribute in any way for non-commercial purposes.

Read more about Early Journal Content at <http://about.jstor.org/participate-jstor/individuals/early-journal-content>.

JSTOR is a digital library of academic journals, books, and primary source objects. JSTOR helps people discover, use, and build upon a wide range of content through a powerful research and teaching platform, and preserves this content for future generations. JSTOR is part of ITHAKA, a not-for-profit organization that also includes Ithaka S+R and Portico. For more information about JSTOR, please contact support@jstor.org.

The INDEX to the Tracts of this Twelfth Year.

A

AIr, in Ireland and in all the English Colonies in America much alter'd by the culture of Land, and by the increase of English Inhabitants. And the Air of Dublin examined for weight by the Baroscope, n. 127. p. 649. 650. Compare this with the advice from Rome for the salubrity of places, n. 66. Two Hygroscopes newly devised, to examine the Air, with some Observations, n. 126, p. 650, and n. 129. p. 715. Of human life long sustain'd under water without air, n. 127. p. 675. The Air of Gornron pestilent, n. 129. p. 711.

Agriculture: Nurseries, profitable Gardens, Orchards and Vineyards, solicited for Cambridge and the North, n. 129. p. 728. Wines made of English fruits, n. 123. p. 574. Advertisements on the same, n. 124. p. 583. How Tobacco is planted and order'd in Virginia, n. 126. p. 634. To adorn Woods, Groves, and the avenues of fair Mansions, n. 126. p. 644.

Anatomy; concerning the Spiral, instead of the hitherto supposed Annular, structure of the Fibers of the Intestines, by Dr. Cole, n. 125. p. 603. Of the Ventricle and Intestines, by Dr. Glisson, n. 128. p. 705. Ophthalmographia, by M. Briggs, n. 129. p. 746. A new structure of the Diaphragm, and a method of preparing the Bowels, by Caspar Bartholin, n. 130. p. 768. The Anatomy of some Animals at Paris, n. 124. p. 591. Dr. Grews Anatomy of Plants vindicated, n. 127. p. 657.

Answers: Dr. Hodgsons Answers to Mr Boyles Inquiries concerning the Subterraneous Fires in the Coal-mines near Newcastle, &c. n. 130. p. 761.

Antiquities: The Britans descended from the Cimbrians, and first discover'd by the Phœnicians, n. 124. p. 596. 598. The Idol Temples and other Heathenish monuments of Old Greece preserved undemolish'd under the Turks Dominion, n. 124. p. 575. The Anti-

quity of our Baths and those of Aquigran compared, n. 123. p. 574. The Consent of Ancient and Modern Philosophy, n. 123. p. 570. The Cartesian prefer'd to the Aristotelian, n. 131. 790. The means to reconcile Chronologers, n. 131. p. 793. Paleologia Chronica, n. 132. p. 808. A Mathematico-historical Table, See Artific. That at Boutan in the Mogols Dominions they had the use of Muskets, Canon, and Powder, many Ages ago some Canon now remarked above 500 years old n. 130. p. 756.

Artifices: Hygroscopes, See Air. The Parilian Water-Engine to quench fires, n. 128. p. 679. A fictitious Stone which imbibes any ordinary day- or candle-light, and for a time retains a fire-like luminousness in any dark place, n. 131. p. 788. To improve Telescopes, n. 128. p. 691. Sugar-Wines drawn from Plants and Fruits, and to dry all whole-some fruit, n. 128. p. 583. How the Germans make Brass of Lapis Calaminaris, n. 130. 768. A magnificent Throne in Denmark made of huge Horns of Fishes, which are there call'd Unicorns horns, n. 130. 766. The great Vessel at Heidelberg described, ibid. An Essay to explain the phenomenon of the Inclinator Needle, towards the finding the Longitude, n. 130. 774. The Steel of Golconda best to be damaskined, and how order'd, n. 129. 715. A Talc in Persia tinged, and mingled with Chalk well steaked, makes Walls shine Jaspis-like, ib. p. 714. The best Glue made of Sturgeon, and how order'd, ibid. How to try true Bezoar, n. 130. 757. Strange magical Juggling, ib. p. 752. A Mathematico-historical Table design'd, n. 127. 667.

Astronomy: Sign. Cassini on the Lunar Eclipse, Dec. 21. 1675. ft. v. and the Occultation of a Fixt star by the Moon, n. 123. p. 565. (compare n. 121. p. 495.) Mr. Flamsteeds answer to Cassini, n. 129. p. 565. Mons. Hevelius on the Lunar Eclipse, Jan. 1. 1676. ft. n. n. 124. p. 590. Mercatoris Institut. A

Astronomica, n. 123 p. 611. Hevelius on the Solar Eclipse, Jun. 23. 1675. *ft.* n. 127. 661. Flamsteed, Townley, Halley, on the Solar Eclipse. Jun. 1 1676. *ib.* p. 662. Cassini on the same, *ib.* p. 669. Hevelius on the same, *ib.* p. 666. Cassini's advertisement about the configuration of Jupiters Satellites for the years 1676, 1677. n. 128. p. 681. A direct and Geometrical method for finding the Aphelions, Eccentricities and proportions of the Orbs of the primary Planets, without supposing the Equality of the Angle of Motion at the other Focus of the Planets Ellipsis, by Mr. Halley 128. 683. Hevelius of the figure of Saturn in Aug. 1675, n. 127. p. 661. Cassini adds a zone about Saturn, as about Jupiter, but more obscure, n. 128 p. 690. Cassini remarks a huge Spot in the Sun, 127. 665. Flamsteed and Halley on the same, 128. 687. Cassini on the same again, *ib.* p. 689. Smethwick on the Solar Eclipse. Jun. 1. 1675. *ft.* v. n. 126 p. 637. approv'd by Cassini, 127. 665. This observ'd at Westminster by M. Smethwick; Mr. Colson, at Wapping, on the same, p. 723. Mr. Halley, 724 M. Bullisldus and M. Richelts on the Lunar Eclipse of Jan. 1 1676. n. 125. p. 610. A Comet, or New Star, or changing Stars said to be seen, n. 123 p. 565, 567.

Animals, in Paris dissected, n. 124. p. 591. Animals in Virginia, n. 126. p. 624, 630; at Comorin, Coromandel, Balsara, 129 713, 714.

Pertian Animals: Camels forbear drink 9 days; carry 1000 l. yea 1500 l. weight, n. 129. p. 713: Cows having no grass to feed on there, are fed with heads of fishes and dates boiled together, p. 714. Porcupins kill Lions by shooting quills into their bodies, *ibid.*

Mogollian Animals; How Elephants prepare for generation, n. 130. p. 753: The Musk-animal; the Bezoar-animal; the Porcupin-stone, *ib.* 756, 757. Ee-le-like Insects bred and swimming

in good pleasant Wine, n. 127. p. 656. Worms falling down with Snow in Hungary, 129. 742. A fomentation made of a decoction of Emmes very Antiparalytical, 129. 743. Anatome of a Tortoise, many singularities, *ibid.*

B

Bathes of England and Aquisgran compared, n. 123. p. 573.

Bezoar, whence, and how to be tried, 130. 756. The Mineral Bezoar, and its Medical uses in Sicily, 127. 672.

Books.

The Royal Almanack, n. 130. p. 774. Animals dissected at Paris, 124. 591. W. Badcock's Touch-stone for Gold and Silver wares, 132. 814.

Th. Bartholin. de Peregrinat. Medica, 127. 671.

Casp. Bartholini de Diaphragm. structura nova, una cum Methodo præparandi Viscera 130. 768.

Bathonienſium & Aquisgranenſium Thermarum comparatio, variis adjunctis illustrata à R. P. 123. 575.

M. de Blegny of the Venereal Disease, 125 622.

M. Bond of Longitudes, 130. 774.

Mr. Boyles Experiments and Notes about the Mechanical Origin and production of divers particular Qualities: Among which is inserted a discourse of the Imperfection of the Chymists doctrine of Qualities; with some Reflexions upon the Hypothesis of Alkali and Acidum. The Qualities here consider'd, are, Heat and Cold, Tasts, Odors, Volatility, Fixedness, Corrosiveness and Corrosibility, Chymical precipitation, Magnetism, and Elasticity, 127. 669. Mr. Brigg's Ophthalmographia, 129. 746.

Dr. Edw. Brown's Account of his Travels through a great part of Germany, 130. 767.

Henr. Bullchof, from Batavia in the East-Indies, of the Gout and its cure by Moxa, 125. 621.

I N D E X.

Dr. Carews *Palaeologia Chronica*, n. 132. p. 808.

Mons. Charas *Pharmacopœe Royale, Galenique & Chymique*, 126. 711.

Mons. du Clos, *sur les Eaux Minérales des plusieurs Provinces de France*, 125. 612.

Mr. Cook, *of the Manner of raising, ordering and improving Forrests, Woods, Groves, to adorn Avenues; with proper Instructions in Arithm. and Geometry*, 126. 644.

Of Education, chiefly of Gentlemen, 123. 572.

Ephemeridum Medico-physicarum Germanicarum Ann. 4. & 5. cum Appendixe. 129. 742.

Fr. Glissonius *M. D. de Ventriculo & Intestinis, nec non de partibus continentibus in genere, & in specie de partibus Abdominis*, 128. 705.

J. B. du Hamel *de Consensu Vet. & Novæ philosophiæ*, 123. 570.

M. de la Hire *Nouvelle Methode en Geometrie pour les Sections des Surfaces Coniques & Cylindriques, qui ont pour base des Circles, ou des Paraboles, des Ellipses & des Hyperboles*, 129. 745.

Anth. Lawrence, *Nurseries, profitable Gardens, Orchards and Vineyards solicited for Cambridge and the Champian Countries, and the North*, 129. 745.

Mr. Mercator, *S. R. S. Institut. Astronomicæ*, 125. 611.

La Mesure de la Terre, 124. 569. compare with this n. 112, and 126. p. 636.

Dr. Megerlins *Mathematico-historical Table designed*, 127. 667.

Mons. Menard: *Nouvelle Science des Temps, ou Moyen general de concilier les Chronologies*. 131. 793.

Dr. Molimbrochii *Cochlearia cæriosa*, Englished, 125. 621.

L'Art de Parler 125. 642.

Mons. Prestet, *Elemens de Mathématiques, ou Principes generaux de*

toutes les Sciences, qui ont les Grands pour Object. n. 126. p. 638.

Joh. Pechlinius *M. D. de Aeris & Alimentis defectu, & Vita sub Aquis*, 127. 675.

Henr. Van Roonhuysen *Observ. Chirurgicæ, with extraordinary Cases of Women in Travel*, Englished, 125. 621.

Joh. Raei *Clavis Philos. naturalis Aristotelica Cartesiana. Edit. secunda, aucta*, 131. 790.

Mr. Sammes, *Britannia Antiqua illustrata*, 124. 596.

Dr. Sydenham, *circa Morborum acutiorum historiam & curationem*, 123. 568.

Mons. Taverniers *Account of his Voyages over the most considerable parts of Asia*, 129. 711, and 130. 751.

Georg. Velschii *Centuriæ duæ Observat. Medico-physicarum*, 127. 673.

Vinetum Britannicum: *How to make many excellent sorts of Wines of English growth*, by J. W. gent. 123. 574. With an advertisement to encourage the same, 124. 583.

Dr. Wallis, *Archimedes Arenarius cum Notis & Versione*, 123. 567.

C

CHINA; a passage to China by land from Muscovia on the North-side of Tartaria Magna, 130. 756.

Cabinets and Repositories: of the G. Mogol, n. 130. p. 754, 755: of the King of Persia, ib. p. 757; of the G. Duke of Tuscany, ibid. of a Throne of Unicorns horns in Denmark, ib. p. 768; of a Jaspis in Vienna, 9 feet diameter, ibid. of rare Manuscripts, ibid. The Elect. of Saxony's Repository furnish'd with very many considerable rarities both of Nature and Art, n. 130. p. 786.

Commodities, very excellent in Sicily, 127. 672. and *Physico-Medical rarities*, ibid.

Commodities of the Mogol and Persia, n. 130. p. 754.

F I N D E X. P

Fires, how to be quenched by a Pa-
rilian Water-Engin, n. 128. p. 679.
The Subterraneous Fire, and its pro-
 ductions in the Coal-mines near New-
 castle, 130. 762.

Fishes, in Virginia, 126. 614. *A*
strange Man-fish there seen, 625.

L

Life: Human life extended long
under water, n. 127. p. 675.

Light: Mr. Newton defends his
doctrine of Light and Colours, 123. 556.
in answer to Mr. Linus's Objections,
 n. 121. p. 459. *Mr. Linus against Mr.*
Newton's theory, 128. 692. *Mr.*
Newton's defence, ib. p. 698 and a-
gainst Mr. Lucas's Light from Dead
flesh, and transmitted meerly by contact,
 125. 599. *Light returned for a while in*
a Facitious stone, 131. 788.

Lake: *Mexico-L.* very strange, 758.

Musk, whence, 130. 756. *Musky scent*
in the Musk-quash, 127. 653.

M

Magnetism: Its force alter'd by
great claps of Thunder and
Lightning, n. 127. p. 648. *Of Magne-*
atism, See Mr. Boyle of Qualities, &c.

Medico-Chirurgical Observations:
In Virginia, 126. 629. *In Persia*, 129.
 712: *Wounds there cured with boyled*
flesh, or with hot fat, best of Horse-flesh,
 ib. p. 713. *Persians very healthful by*
drinking a decoction of China-wood,
 and they know nothing of the Stone or
Gout, ibid. *The Preparation of the Hel-*
montian ludus, 127. 742. *The Oyl*
drawn of Black flints, cures the Stone
in the Bladder, ibid. *The Spirit of Spa-*
nish salt potent against the Strangury,
 ib. *Hemlock with Sugar allays the heat*
of the Liver, ibid. *Trifolium palu-*
stre cures the Gout, 743.

N

Natural History collected, n. 123.
 p. 551. *A Fish resembling a man*,
 ib. p. 625. *From Dublin*, 127. 647, and
 129. 715.

Nutmeg, planted by Birds voiding
 them, 130. 754.

Phylick and Chirurgery how pra-
cticed in Persia, n. 129. p. 712, 703.
in Virginia 126. 629, 630.

Plants, 127. 672. *In Virginia*, and
how Tobacco planted and order'd there,
 126. 618. *Plants and Commodities in*
Sicily, 127. 672. *In Persia*, how Palm-
 trees are propagated, 129. 714. *In the*
Mogol, 130. 754. *That Nutmegs are*
planted only by Birds dunging, ib. *Cina-*
mon-trees sent out of Ceylon, in chests
 filled with the Native earth, thrive well
 in Holland, 129. 743. *Rock-plants*:
Mr. J. Beaumont proveth, that Plants,
Fishes, Shells, and figures of *Animals*
are found growing in the Rocks and
clefts of Rocks in Mendip-mines, not
 brought thither and so petrified there,
 129. 724, and 737. 738. *Gunpowder*
made of the Salt of Centaurium mi-
nus; but stronger Gunpowder prepared
 out of the Salt of another Vegetable not
 named, 127. 673. *A Gangrenizing and*
infectious Rye at some seasons in some
places of France, 130. 758. *The powder*
of the Mogullian Indigo pierces in-
credibly, ib. p. 754. *The Mogullian*
Sugar being kept 30 years, becomes
 poyson, ibid. *The fruit of Solanum Ve-*
licarium suddenly changeth taste from
sweet to bitter, 127. 673. *The juice of*
Vines frozen and representing the fi-
gures of V. and Grapes, 129. 743. *The*
like figurat. in Snow, ib. p. 739. *The*
Text. of Trees accurately anatomiz'd,
 127. 696.

S

Stones, bred in many Horses as well
 as in men, and the Bozoar-like ver-
 tue of these Stones, n. 129. p. 743.

T

Travels from Venice through
 Dalmatia, and Greece, and *Ad.*
Vernons Account, 124. 575.

W

Water-Engin to quench Fires,
 from Paris, 128. 679.
 World: The figure of the grand system
 of the World represented by the superfi-
 cies of Fluids, and by liquors contig-
 nous, 131. 775, and 132. 799.
